Internet Programming Lab – CS8661
Programming Assignment 17 - HelloPHP Application using Apache Tomcat Server

Write index.html to retrieve the name of the user. Set the method attribute of the form to “get” to generate GET request to the server. Write a PHP script to display welcome message along with the name when the submit button is clicked.

index.html

```
<html>
<body>
<form method="get" action="hello.php">
<input type="submit" >
</form>
</body>
</html>
```

hello.php

```
<?php
echo "hello"
?>
```

OUTPUT:

← → ↻ ⓘ localhost/HelloPHP/hello.php?

hello
